EDUCATION

University of Mumbai <i>B.E. in Computer Science and Engineering (Data Science)</i>	2023 – 2026 Mumbai, India
MSBTE, Mumbai <i>Diploma in Computer Engineering</i>	2019 – 2022 Mumbai, India

EXPERIENCE

Technical Head - CSI VCET <i>VCET, Mumbai, India</i>	Aug 2025 – Present
– Led the Technical Team of the CSI (VCET), overseeing technical planning and execution of club initiatives. – Coordinated with committee members and faculty to make decisions, and ensure smooth execution of activities. – Guided team members in work, reviewing, and improving content, enhancing the overall quality and effectiveness of events.	
Freelance Developer <i>Remote, India</i>	December 2025 – Present
– Developed and optimized client project modules using various technologies, focusing on on-time delivery. – Collaborated directly with clients to refine workflows and resolve full-stack issues, consistently delivering high-quality code. – Enhanced and optimized components, contributing to smoother user interactions.	
Full Stack Developer Intern <i>Stride Ahead, Delhi, India</i>	July 2025
– Built and maintained features using Next.js and React alongside experienced developers in a remote setting. – Collaborated with the team to debug issues and review code, ensuring adherence to quality standards.	

PROJECTS

Real Time Options AI Trading System <i>Python, FastAPI, Next.js, PostgreSQL, Redis, XGBoost</i>	<i>Confidential</i>
– Developed a fully automated options trading platform for NIFTY indices, implementing high-frequency quantitative algorithm and live Black-Scholes Greeks calculation via Fyers API. – Engineered an AI-driven "Risk Gate" to predict market risk, reducing drawdown by blocking high-risk entries and triggering automated exits during high-volatility. – Achieved an 83% accuracy rate on over 14,700+ simulated trades and used scalable database architecture using PostgreSQL and Redis	
SupplyFlow – Inventory Management System <i>Python, JavaScript, React, MongoDB</i>	GitHub
– Built application with tests, implementing supply chain algorithms (EOQ, ROP, ABC analysis) and real time notifications for automated inventory tracking. – Implemented a security layer with role-based access control, rate limiting, and schema validation, preventing NoSQL injection and unauthorized access attempts.	

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript	Databases: MySQL, PostgreSQL, Redis, Firebase, MongoDB
Frameworks: FastAPI, React, NextJS	Tools: Git, AWS, Vercel

CERTIFICATIONS & COURSES

- **University of Helsinki Programming Python MOOC 25**
- **HackerRank SQL Basic Certification**
- **HackerRank SQL Intermediate Certification**

ACHIEVEMENTS

- **IEEE Conference Paper** — Published and presented at TQCEBT'26, CHRIST University.
- **VNPS 2026** — Won 2nd Prize, National Project Showcase.
